

BRIDGE TODAY. TRANSFORM TOMORROW.

TA1610 16 FXO VoIP GATEWAY

Yeastar TA1610 FXO VoIP Gateway

Connect Traditional PSTN Lines to Modern VoIP Networks Without Replacing Your Existing Infrastructure.

BUSINESS CHALLENGE

- Many businesses still rely on traditional PSTN lines for critical voice communications.
- High costs and inflexible infrastructure slow down digital transformation.
- Replacing existing phone systems is expensive and disruptive.
- Lack of integration between legacy lines and modern IP systems.

TA1610 SOLUTION

Yeastar TA1610 FXO VoIP Gateway connects up to 16 analog lines to IP PBX systems and VoIP networks. It preserves your existing phone investments while enabling advanced VoIP features, lower costs, and future-ready communications.
